BEST OF CLASS

IN ARCHITECTURAL ELEGANCE & ENERGY PERFORMANCE

THE DISCERNING HOMEOWNER WILL APPRECIATE THE CLASSIC SERIES' HIGH ENERGY PERFORMANCE, ENHANCED STRUCTURAL DESIGN AND EXTENSIVE SELECTION OF ARCHITECTURAL STYLES. AVAILABLE IN THE STANDARD 3 1/4" FRAME AND THE SUPERIOR 4 1/2" FRAME DEPTH.

The increased depth of the 4 1/2" frame is ideal for:

- Architectural styling beyond basic home designs
- Masonry exterior finishes
- Insulated Concrete Form (ICF) construction
- R-2000 energy standard homes

This symbol certifies that Global Windows & Doors meet Energy Star High Efficiency guidelines.

FRAME DEPTH MAKES ALL THE DIFFERENCE

Performance. The 4 1/2" frame positions the glass closer to the inside "warm wall" reducing exposure to the elements, minimizing trapped air and allowing better airflow on the glass surface. The result is reduced heat loss and less potential for condensation.

Beauty. From the exterior the window is recessed from the outside wall surface giving your home the unmistakable look of quality and elegance of an old style traditional wood window.
